

## Is your radio battle-ready?

Two ways to test it:  
**easy and  
very easy.**

**AEROFLEX**  
A passion for performance.

**Six easy standoff tests** determine if a platform's entire radio communications system is battle-ready. These tests can be performed anywhere. On the runway. At the staging area. In the desert or in the mountains. Rest assured, the 3500 Series accurately tests your platform's tactical radios, antennas, and cabling so you'll know you're ready.

**Simple Go/No-Go standoff test** for even faster testing. With guided scripts, anyone can learn to use the 3500 Series in minutes. Guided automated scripts are available or can be developed for your specific tactical radio communications test needs. Platform test information is displayed as OK or FAIL, allowing anyone to perform standoff testing.
